PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 10+ years of experience building and modernizing enterprise applications using C#, .NET, Angular, SQL Server, and Azure technologies. Strong background delivering business-critical systems, REST APIs, frontend applications, and scalable backend services in enterprise financial and document management environments.

TECHNICAL SKILLS

- C#, .NET Core, ASP.NET MVC, REST APIs
 - Angular, TypeScript, JavaScript, Next.js
 - SQL Server, T-SQL, Stored Procedure, Entity Framework Core, XML
 - HTML5, CSS, LESS, Responsive Design
 - Microsoft Azure, Git, CI/CD
 - Python, GitHub Copilot, Antigravity
 - Agile/Scrum, Unit Testing
-

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Broadridge Financial Solutions

Houston, TX | 2017 – Present

- Develop and maintain enterprise-scale financial applications using C#, .NET, Angular, SQL Server, and REST APIs.
- Contributed to modernization efforts replacing legacy systems with modern web-based architecture.
- Designed backend services, API integrations, and frontend enhancements supporting portfolio management workflows.
- Collaborate with product owners, QA teams, and developers to deliver software solutions in agile environments.
- Troubleshoot production issues, improve application performance, and participate in architecture discussions and code reviews.
- Mentor junior developers and support team implementation efforts.
- Utilize AI-assisted development tools including GitHub Copilot and Antigravity to improve engineering productivity.
- Built internal orchestration workflows leveraging AI-assisted development practices for debugging, implementation support, and engineering workflows.

Senior Software Developer

Dokmee

Houston, TX | 2014 – 2017

- Developed enterprise document management applications using C#, ASP.NET MVC, SQL Server, JavaScript, and web technologies.
- Built features supporting workflow automation, document processing, scanner integrations, and database-driven systems.
- Developed SQL queries, stored procedures, and ETL-related operations.
- Troubleshoot production issues and implemented scalable software enhancements.
- Assisted with deployments, debugging, testing, and customer support.

Application Developer Intern

TC Energy

Houston, TX | 2012 – 2013

- Supported enterprise applications and integrations for Oil & Gas business operations.
 - Developed a Silverlight-based internal asset and user management application.
 - Collaborated with support and integration teams to troubleshoot production issues.
-

SELECTED PROJECTS

OrderSystem (Portfolio Project)

- Developed an enterprise-style order management application to showcase modern software architecture and full-stack development practices.
- Structured the solution around clean separation of responsibilities, reusable business services, and API-centric design.
- Incorporated considerations for security, reliability, observability, and future scalability throughout the application lifecycle.

Python Stock Backtester

- Built a Python-based stock backtesting application to analyze trading strategies using historical market data.
 - Developed features for strategy comparison, signal scanning, performance analysis, and data visualization.
 - Explored workflow automation and rapid prototyping using Python and Streamlit.
-

EDUCATION

Master of Science in Data Science (In Progress)

University of Texas at Austin

Bachelor of Science in Computer Science

University of Houston
